About us

The key market sectors we serve are **Healthcare, Personal Care and Cosmetics, Food and Beverage and Household and Industrial.**

Our clients include global and local branded consumer packaged goods companies, pharmaceutical laboratories, retailers, contract manufacturers, hospitals and well-funded entrepreneurial start-up companies.

Our products include an extensive range of plastic bottles, glass bottles, aluminium bottles, airless bottles, plastic jars, glass jars and aluminium jars.

We also supply a large range of compatible closure systems including plastic, tinfoil and aluminium caps and jar lids, dispensing closures, child resistant caps, tamper evident caps, flip top caps, disc top caps, finger sprayers, trigger sprayers, lotion dispensers, treatment pumps, foamers, dropper caps, pipettes and rubber stoppers.

An enormous number of our products are available direct from stock with short lead-times.

The Neville and More difference

We believe that our success is based on the simple objective of providing high quality, appealing, innovative products direct from stock, backed up by an enthusiasm and determination to provide exceptional customer service.

- ✓ An ability to really listen and comprehend YOUR requirements.
- ✓ Combine this understanding with our extensive knowledge of, and relationships with, top manufacturers and sourcing partners around the world.
- ✓ Use this combination of understanding, knowledge and experience to offer YOU creative, reliable and cost effective products and solutions that are tailored to YOUR needs.
- ✓ A large stockholding of innovative, appealing, high quality packaging which means reduced lead-times. We stock so YOU don't have to.
- ✓ Purpose built Exhibition and Sampling Centre that YOU can visit to accelerate and simplify YOUR packaging development process.
- ✓ Comprehensive supplier approval process including supplier audits, risk assessment, supplier evaluation and validation.
- ✓ Supply Chain Management, including Production Scheduling and Dual Sourcing to enable just in time delivery and contingency arrangements to facilitate continuity of supply which means less risk for YOU.
- ✓ In-House Laboratory Testing Facility including accelerated product shelf life analysis and vacuum leak testing of container/closure compatibility, to reduce YOUR risk.
- ✓ An in depth knowledge and understanding of key manufacturing processes such as Injection Moulding, Extrusion Blow Moulding, Single and Two Stage Injection Stretch Blow Moulding and Glass Manufacturing.

Case studies in a nutshell

Created **flexible cost-effective UK-based manufacturing facility** to produce large plastic supplement jar for UK healthcare company.

Managed the **re-supply and stockholding facility** of plastic bottles to support the relocation of production of healthcare brand from USA to UK.

Annual quantity THREE MILLION UNITS.

Neville and More opens brand new distribution centre, exhibition and sampling centre, and testing laboratory

Exhibition and Sampling Centre

Visit our unique display of innovative bottles, jars, closures, dispensers and sprayers.

Testing Laboratory

Our in-house laboratory can carry out tests such as accelerated shelf life compatibility and vacuum leak testing.

This new facility includes a purpose built distribution centre, assembly and dispenser dip tube cutting suite, product exhibition/sampling centre and testing laboratory.

The development incorporates state-of-the-art photovoltaic solar panels to generate its own efficient source of renewable energy which satisfies all operating power requirements within the building.

The new distribution centre provides capacity for several thousand fully racked pallet spaces which enables safe, clean storage, traceability, safety stock and just-in-time delivery.

This investment enables Neville and More to offer even more innovative, appealing, high quality bottles, jars, closures, dispensers and sprayers direct from stock with flexible minimum order quantities.

The facility is connected to Neville and More's existing warehousing and distribution centre by a fire proof tunnel which provides two interconnected, but separate, operating units. This facilitates continuity of supply and built in contingency arrangements in the event of an unexpected incident in one of the facilities. It also satisfies a key disaster recovery requirement not only for Neville and More but for all industries supplied.

Neville and More, Unit 15, Oakhurst Business Park,
Southwater, West Sussex RH13 9RT, England.
