About Neville and More:

Neville and More is a leading packaging supplier with over 70 years of experience in supplying high quality primary packaging to multiple industries.

Our clients include global and local branded companies, pharmaceutical and generic manufacturers, laboratories, confectionary suppliers, food and beverage companies, entrepreneurial start-ups and retailers.

Our products include an extensive range of plastic bottles, PCR bottles, glass bottles, aluminium bottles, airless bottles, plastic jars, health supplement jars, glass jars, aluminium jars, lightweight glass bottles, bottles and vials for infusion and injectable products and dropper bottles.

We supply a large range of compatible plastic caps and dispensing systems including child-resistant caps, tamper-evident caps, flip top caps, disc top caps, plastic oral dosing syringes, finger sprayers, trigger sprayers, lotion dispensers, foamers, rubber stoppers in chlorobutyl and bromobutyl, dropper caps and pipettes and aluminium closures.

An enormous number of our products are available direct from stock with short lead times and flexible minimum order quantities.

The Neville and More difference

Listening and understanding

• We genuinely listen to customer requirements and only move forward with projects when we fully comprehend our clients’ needs.

• Our extensive knowledge of, and relationships with, top manufacturers and sourcing partners worldwide allow us to satisfy those requirements.

• This combination of understanding, knowledge and experience enables us to offer creative, reliable and cost-effective packaging tailored to customer needs.
We believe that our success is based on the simple objective of providing high quality, appealing, innovative packaging direct from stock, backed up by an enthusiasm and determination to provide exceptional customer service.

**Speed and efficiency**

- Neville and More stocks numerous innovative and appealing packaging items which means reduced lead times: we stock so you don’t have to.

- We offer our customers an Exhibition and Sampling Centre they can visit to accelerate and simplify the packaging development process.

- We are experts in key manufacturing processes such as injection moulding, extrusion blow moulding, single and two stage injection stretch blow moulding and glass manufacturing.

**Lowering your risk**

- We provide supply chain management, including production scheduling and dual sourcing for just-in-time delivery and contingency arrangements for supply continuity.

- We have an in-house laboratory testing facility that offers accelerated product shelf life analysis and vacuum leak testing of container/closure compatibility.

- Our comprehensive supplier approval process includes vetting procedures such as supplier audits, risk assessment and supplier evaluation/validation.
Some examples of Neville and More’s work with customers:

- Worked with major UK healthcare brand owner to re-source a spray dispenser to overcome quality problems with incumbent supplier. Validated product in Neville and More Testing Laboratory.  
  Market volume SEVERAL MILLION UNITS

- Invested in new capping and shrink wrapping facility to secure contract with major UK health and beauty retailer.  
  Annual volume SEVERAL MILLION UNITS

- Managed the re-supply and stockholding facility of plastic bottles to support the relocation of the production of a healthcare brand from the USA to the UK.  
  Annual quantity 3 MILLION UNITS

- Advised a pharmaceutical manufacturing facility on an alternative supply chain, resulting in significantly reduced unit costs and shorter production and delivery lead-times for a range of type 1 tubular glass vials and ampoules.  
  Annual volume SEVERAL MILLION UNITS

- Created, launched and stocked a new range of sixteen standard plastic foamer bottles in PET and HDPE with matching foamer heads to support growth in popularity of foaming products.

- Created an innovative, colour matched, cool matt frosted turquoise low profile jar for the initial launch of a hair sculpting crème. The initial production quantity of 10,000 units enabled the brand to launch an exquisite new pack whilst reducing the investment risk associated with an unproven product in a crowded marketplace.

- Created a new range of bottles and matching brand embossed aluminium closures for a market leading brand of fishing baits. The transparent bottles enabled the vividly coloured product to achieve maximum eye catching shelf impact and increased sales.

- Managed and completed plastic bottle material conversion for major healthcare brand owner. Created duplicate plastic bottle tooling in two different manufacturing facilities to provide dual sourcing and contingency planning.  
  Annual volume SEVERAL MILLION UNITS

- Created flexible, cost effective, UK based manufacturing facility to produce large plastic supplement jars for UK healthcare company.

- Consolidated the supply of a range of glass and plastic jars and bottles, including compatible closures, dispensers and sprayers for a major UK retailer. The resultant partnership agreement reduced component costs and delivery lead-times by implementing a stockholding programme at Neville and More’s purpose built distribution centre.

- Provided reliable and cost-effective alternative manufacturing source for UK retailer concerned about consolidation in the supply base for plastic bottles and jars.

- Designed, launched and stocked a new range of nine different glass bottles and jars for cosmetic and beauty lotions, creams and fragrances. Range used by major UK fragrance retailer to rapidly launch new brand.

- Developed uniquely shaped plastic PET bottle and dispensing closure for range of marinades and dressings for major UK supermarket.  
  Annual quantity over 500,000 UNITS

- Launched Tea brand in innovative new plastic jar following successful completion of compatibility testing with closure liner in Neville and More Testing Laboratory.

Featured products are available direct from our extensive Stockholding Facility and Distribution Centre.

It is essential to test all packaging to ensure compatibility with the filled product. Neville and More’s In-House Laboratory Testing Facility (see page 28 for details) can carry out relevant testing on request.
The Simplicity family is an extensive range in plastic (HDPE and PET) and glass cylindrical bottles. Colours available direct from stock include clear PET, white and natural HDPE and clear glass. All bottles in the Simplicity range have the same GCMI 410 neck specification, which enables absolute consistency for closure compatibility. The versatile Simplicity bottle range is ideal for packaging liquids, gels and lotions which require a quality and secure environment.

Alpha Closures, Dosing Caps and Measuring Cups

Alpha Tamper-Evident Closures
A range of tamper-evident closures available direct from stock, with liner or plug seal. Special colours available for minimum order of 30,000 units.

Alpha Child-Resistant and Tamper-Evident Closures
A range of child-resistant and tamper-evident closures available direct from stock. Special colours available for minimum of 30,000 units.

Alpha Dropper and Dosing Closures
A range of dosing and dropper caps with the added benefits of child-resistance and tamper-evidence.

Alpha Measuring Cups
An extensive range of CE marked measuring cups, designed to fit on the Alpha child-resistant and tamper-evident closure ranges.

Alpha Plastic Oral Dosing Syringes
A comprehensive range of CE marked, graduated plastic oral dosing syringes in a variety of sizes including 0.5ml, 1ml, 3ml, 5ml, 10ml and 20ml. Press-in-bottle adaptors available for both glass and plastic bottles to enhance convenience. Individual protective sachet option available to enhance cleanliness.

Tamper-Evident Lotion Dispensers
Tamper-evident Lotion Dispensers are designed to enhance product safety and integrity. The tamper-evident band on the closure of the dispenser provides a deterrent to opening or interfering with the contents of the bottle.

Metal-free fluid path enhances protection for sensitive product formulations.
Dropper Bottles in Glass and PET

A range of glass and plastic dropper bottles. Glass bottles available direct from stock include amber, clear, blue and green. Plastic bottles available direct from stock include amber and clear PET. Sizes range from 5ml to 100ml.

### Dropper Pipettes

A range of 18mm DIN Pipette dropper caps with plastic or rubber teats and glass or plastic pipettes. Child-Resistant and Tamper-Evident options available.

Teat Dropper Pipettes with metal overshell

Tamper-Evident Pipettes

Lotion and spray pumps specifically developed for use with dropper bottles.
Dropper Caps
Available direct from stock in black and white

With SPECIAL COLOURS available on request

With over 70 different dropper and dosing inserts in stock we can meet specific dispensing performance requirements for a huge variety of dropper speeds, flow properties and liquid viscosities.

All our dropper and dosing inserts come pre-assembled into a simple screw on cap, a tamper-evident cap, a child-resistant cap or a combination child-resistant and tamper-evident cap. This pre-assembly means it is very easy to apply the dropper and cap to the bottle in a single action.

There are two main types of dropper inserts: Horizontal Droppers and Vertical Droppers.

Horizontal Droppers
Horizontal droppers are also commonly known as rim droppers or all round droppers.
This type of dropper can be used for an extremely wide spectrum of applications and is generally specified when precise dosing of product is not an absolute requirement due to the fact that the dosing volume of this type of dropper may vary. This variance results from the angle (normally between 120 - 150 degrees) at which the bottle is held by individual consumers when dispensing the product.
The Horizontal Dropper has a central air hole surrounded by a series of smaller liquid dispensing holes positioned in a circle.

Vertical Droppers
Vertical Droppers, as the name suggests, are used for dispensing liquids when the bottle is held at 180 degrees (upside down). Vertical droppers are designed to dispense very precise drop volumes with low variation in dosage.
The Vertical Dropper is designed with two channels: a central dropper channel from where the liquid exits the bottle and a longer side air channel to allow the air back into the bottle. The dropping speed, drop size and weight are controlled by the diameter of the apertures in the liquid and air channels. We stock a wide range of vertical droppers with varying aperture sizes to enable specific dispensing performance tailored to the precise characteristics of the liquid.

We have a large range of alternative dropper inserts available to provide different dropping speeds and performance suited to products of different viscosity.

Please contact us for advice on the best dropper to suit the dispensing requirements of your product.
We offer a wide range of dropper pipette solutions for healthcare and pharma applications. Standard dropper bulb materials include natural rubber, butyl rubber and TPE (injection moulded thermoplastic elastomere, which are available in a range of different colours).

Standard pipette materials include glass and polypropylene plastic which can be tailored to the exact height of the dropper bottle. Pipettes can also be supplied with printed graduations.

Clean Sachet Packaging

Pipettes can be supplied in protective sachets for enhanced cleanliness. Clean room assembly an additional option. Please consult us for further information.

Our pipette closures are available as non tamper-evident or tamper-evident for enhanced product protection.

Sterilisation and CE Mark Development

Pipettes can be supplied sterile in sealed plastic sachets using a variety of sterilisation options including gamma irradiation, ethylene oxide or steam sterilisation. Sachet labelling includes full batch traceability and expiry date. We also offer a comprehensive medical device CE Mark development process with CE Mark authorized body identification clearly marked on each individual pipette protective sachet.
Foaming Dispensers and Bottles

Foaming Dispensers create a smooth, rich foam to enhance the consumer experience. Instant foaming provides an invigorating and luxurious user experience.

Neville and More stocks a range of Hand Held Foamer dispensing heads and Mini Foamer dispensing heads, together with an extensive range of compatible bottles in PET and HDPE.

Hand Held Foamers
43mm neck
A range of four different bottles; 100ml, 150ml, 200ml and 250ml in both HDPE and PET.

Mini Foamers
30mm neck
A range of four different bottles; 30ml, 50ml, 80ml and 100ml in both HDPE and PET.

24mm 410 Foamer
A foaming dispenser specifically developed for use on standard bottles with a common 24mm 410 neck, which converts existing standard bottles into foamer bottles.

For further information call +44 (0)1403 732 290
For further information visit our website at www.nevilleandmore.com
Airless Bottles and Vacuum Airless Jar Dispensers

Airless Bottles
An extensive range of Airless Containers offering significant advantages including:

- Protection of product from oxygen degradation/contamination so increased shelf life and maintenance of product integrity
- Protection against microorganisms
- Enables usage of all the product in the container . . . leading to reduced wastage
- Reduction in the usage of synthetic anti-microbial preservatives in products
- The pack can be used in an upside down position for versatile application
- Can be used to dispense high viscosity products
- Extended product shelf life
- Composed of only 7 component parts so easier to recycle

Standard Airless Bottle sizes include:

| 15 | 30 | 50 | 100 | 150 | 200 |

Vacuum Airless Jar Dispensers

- Suitable for dispensing heavy, viscous products
- Easily adjustable output 3ml/5ml/7.5ml
- Double tamper-evidence on the dispenser and the container
- Lockable pump to prevent unintentional dispensing
- Self-closing protective nozzle to prevent drying or contamination of the contents
- Available in single carton quantities from stock

Sizes available include:

| 250 | 350 | 500 | 600 | 750 | 1000 | 1500 | 1750 |

For further information visit our website at [www.nevilleandmore.com](http://www.nevilleandmore.com)
Simplicity Jars in Plastic (PET and Polypropylene) and Glass

The Simplicity range is an extensive range of jars in plastic (PET and polypropylene) and glass, available in more than thirty different sizes from 10ml to 5,000ml.

Colours available direct from stock include clear PET, natural and white polypropylene, clear and amber glass. All jars in the Simplicity range have the same GCMI 400 neck specification, which enables absolute consistency for closure compatibility.

The versatile Simplicity jar range is ideal for packaging a wide range of products including supplements, capsules, powders, creams, gels, pastes, ointments, exfoliators, scrubs, body butters, masks, hand, foot and haircare and bath salts.

HPP Bottles and The Jottle

HPP (High Pressure Processing) Bottles

A new range of plastic (PET) bottles, specifically for use during High Pressure Processing (HPP) treatment of beverage products.

This extensive range of bottles includes 40 different products, ranging in size from 30ml to 1000ml capacity. Shapes include round and square.

Single shot sizes are available in 30ml, 50ml, 60ml, 100ml and 125ml capacities.

The entire bottle range is compatible with tamper-evident closures to enhance product safety.

The tamper-evident closures have been designed to retain the integrity of the bottle closure seal during the high pressure treatment, ensuring that no leakage of product occurs during or after the treatment process.

This specification means the bottles are ideal for retaining the fresh flavour of products such as juices and smoothies.

The non-thermal HPP process keeps the original fruit/vegetable taste and colour, allowing the creation of high quality premium beverage products.

The desired microbial inactivation is achieved whilst ensuring the nutritional and functional properties of the products remain intact. This process is therefore beneficial for use in the development of natural, organic, preservative free and functional products, whilst at the same time extending product shelf-life.

In addition to the standard HPP bottle range, Neville and More can also design and create a specific custom developed bottle shape with brand name embossing for an investment of only £5200.

The Jottle

The Jottle is a jar in the shape of a bottle or a bottle in the shape of a jar ... whichever description you prefer. The Jottle is available in a 500ml size, with the Champagne Jottle available in the larger 1100ml and 1700ml sizes. The Jottles have a detachable closure at the base for filling and accessing the product.

The Jottle and associated closures are stock items at Neville and More with a minimum order of just a single pallet.
Neville Square PET Bottles, Miniature PET Bottles, Dry Powder & Glitter Spray Plastic Bottle Pumps and PET Oval Bottles

Neville Square PET Bottles

The Neville Square family of bottles is a range of imposing square bottles in clear PET. All Neville Square PET bottles have the same tamper-evident neck specification, which enables absolute consistency for closure compatibility.

The versatile Neville Square bottle range is ideal for packaging liquids, sauces, marinades, oils, vinegars and dressings which require a quality and secure environment.

Neville Square PET bottles available direct from stock include:

| Clear | 150 | 250 |

Miniature PET Bottles

An extensive range of miniature PET bottles from 10ml to 50ml in cylindrical and square shapes. Perfect for packaging small or sample packs of a wide range of liquid products.

Dry Powder and Glitter Spray Plastic Bottle Pumps

A range of spray pumps ideal for dispensing solid dose products such as cake decoration products.

Available in 14ml, 18ml, 25ml, 30ml, 35ml, 50ml, 60ml, 80ml, 110ml, 120ml, 140ml and 180ml capacity.
Multi-layer Plastic Bottles

Multi-layer plastic bottles are produced by a process known as co-extrusion. This results in the production of plastic bottles with walls that are composed of layers of different materials bonded together (in this case, polypropylene and EVOH).

The multi-layer provides a barrier to oxygen ingress which means enhanced product shelf life. This is particularly beneficial for food products.

The multi-layer structure of the bottle walls also enables them to be hot filled at an elevated temperature of around 96 degrees Celsius to prevent bacterial growth.

Multi-layer bottles are ideal for packaging a wide range of products including liquids, sauces, pastes, pickles, marinades, oils, dressings and condiments, all of which require a quality and secure environment.

Multi-layer PP-EVOH-PP bottles available direct from stock:
Top Down oval: 290 321 460 515 740 970

For further information visit our website at www.nevilleandmore.com

All capacities in ml.
Entice PET and Top Down PET Bottles

Entice PET Bottles
A range of squeezable PET Oval bottles in four sizes from 180ml to 425ml.
The versatile Entice bottle range is ideal for packaging liquids, sauces, marinades, oils, dressings and honey. Entice bottles can be stored either Top Up or Top Down where the product is ready for immediate pouring/dispensing.

Dispensing Solutions for healthcare and pharma products

Tamper-Evident Lotion Dispensers
Tamper-evident Lotion Dispensers are designed to enhance product safety and integrity. The tamper-evident band on the closure of the dispenser provides a deterrent to opening or interfering with the contents of the bottle.

Metal-free fluid path enhances protection for sensitive product formulations.

Plastic Oral Dosing Syringes
A comprehensive range of CE marked graduated plastic oral dosing syringes in a variety of sizes including 0.5ml, 1ml, 3ml, 5ml, 10ml and 20ml. Press-in-bottle adaptors available for both glass and plastic bottles to enhance convenience. Individual protective sachet option available to enhance cleanliness.

Powder Scoops
A wide range of standard plastic powder scoops in sizes ranging from 5ml to 60ml and available from stock.
Finger Sprayers with Overcap
Available direct from stock

Available in 18mm, 20mm and 24mm closure options.

Available in 24mm size.
Stock colours include white, natural and black actuator with shiny silver overshell.
Overshell also available in matt silver, matt gold and shiny gold.

Overcap options include translucent and solid colours

Finger Sprayers with Overcap and Anodised Aluminium Closure
Available direct from stock

Available in 24mm size.
Stock colours include white, natural and black actuator with shiny silver overshell.
Overshell also available in matt silver, matt gold and shiny gold.

Brand embossing service available for aluminium overshell

Finger Sprayer with Anodised Aluminium Closure and Natural Safety Clip
Available in 18mm, 20mm and 24mm closure options.

Special colours available on request

All plastic options now available

For further information visit our website at www.nevilleandmore.com
For further information call +44 (0)1403 732 290
Mini Trigger Sprayers
Available direct from stock

Available in 20mm, 24mm and 28mm sizes. Colours available direct from stock include white, natural and black, with special colours available on request. New High Viscosity Version now available for dispensing viscous liquids.

Lock Up and Lock Down Lotion and Gel Dispensers
Available direct from stock
Lock Up Dispensers eliminate discharge of product during locking
Lock Down Dispensers provide a more compact pump

Available in 22mm, 24mm and 28mm sizes. Colours available direct from stock include white, natural and black, with special colours available on request. Available in a range of different outputs. Closures include ribbed and smooth options with a wide range of different actuator styles such as Palm Top.

Lock Up Lotion and Gel Dispensers with Anodised Aluminium Closure
Available direct from stock

Available in 24mm and 28mm sizes. Colours available direct from stock include white, natural and black with shiny silver overshell. Special colours available on request including matt silver, matt gold and shiny gold overshells.

24mm 410 and 28mm 410 360° SPRAYER
Spray from any angle to get into those awkward corners

For further information call +44 (0)1403 732 290

| Capacity (ml) | 30 | 50 | 100 | 150 | 200 | 250 | 300 | 500 | 1000 |

Aluminium Jars

An extensive family of wide neck aluminium jars with matching screw on aluminium closures.

Coloured and Printed Aluminium Bottles

Coloured and printed aluminium bottles available for minimum order of 5,000 units.
Neville and More operates from a recently constructed facility that incorporates the latest energy conservation technologies.

This includes roof mounted solar panels that create an energy neutral building. This efficiency is reinforced by the use of the latest building materials such as cladded wall panels to increase the insulation and reduce energy loss from our facility.

We have installed a baler system at our facility in order to compact and recycle paper, board and plastic materials.

Any rejected glass is also recycled.

Whilst appreciating that packaging is an indispensible part of modern life, Neville and More is sensitive to the impact that packaging waste materials can have on our environment.

The raw materials used in the manufacture of Neville and More products are all recyclable.

This includes glass bottles, glass jars, HDPE bottles, polypropylene jars, PET bottles, PET jars and polypropylene closures.

Due to the growing concern about the environmental impact of PVC, Neville and More phased out the usage of all PVC containers many years ago.

Neville and More is actively supplying products manufactured from post-consumer recycled resins. This includes PET bottles and jars and polypropylene closures that are used in the Healthcare and Pharma Industries.
Accelerate and simplify your product development process by discussing the benefits of different packaging options with our highly experienced team of packaging experts.

Enjoy this unique opportunity to see, under one roof, our complete, extensive and ever growing product range.

Gain inspiration with innovative, quality packaging solutions, tailored to your needs, giving you the competitive advantage essential in today’s marketplace.

Having identified the most appropriate packaging for your product, go straight to our adjacent, integrated sampling centre to select the samples of your choice ready to take away there and then.
Sampling Centre

Our extensive Product Sampling Centre contains thousands of different bottle, jar, closure, dispenser and sprayer samples, all meticulously labelled and archived for rapid identification, collection or despatch.

Efficient selection and shipment of samples to our clients is an essential part of our customer service and a requirement to enable our customers to carry out relevant and timely consumer product research and essential compatibility testing.

“Reduces decision times by being able to compare packaging instantaneously rather than the procrastinated alternative of postal samples.”

For further information call +44 (0)1403 732 290

For further information visit our website at www.nevilleandmore.com
Our facility includes a purpose built distribution centre, assembly and dispenser dip tube cutting suite, product exhibition/sampling centre and testing laboratory.

Our distribution hub provides capacity for several thousand fully racked pallet spaces which enables safe, clean storage, traceability, safety stock and just-in-time delivery.

This incorporates state-of-the-art photovoltaic solar panels to generate its own efficient source of renewable energy which satisfies all operating power requirements within the building.

Our storage facility is split into two separate units, interconnected by a fire proof tunnel. This facilitates continuity of supply and built in contingency arrangements in the event of an unexpected incident in one of the facilities. It also satisfies a key disaster recovery requirement not only for Neville and More but for all the industries we supply to.

Exhibition and Sampling Centre
Visit our unique display of innovative bottles, jars, closures, dispensers and sprayers.

Testing Laboratory
Our in-house laboratory can carry out tests such as accelerated shelf life compatibility and vacuum leak testing.
